Agricultural Projects & Practices ➤ Cropland Water Savings

A multi-county program assisting landowners to retire ground water sourced irrigated cropland for 15 years to help reduce consumptive use within the Eastern Snake Plain Aquifer (ESPA), allowing for stabilization and replenishment of the aquifer. There are 187 active contracts enrolled covering 18,484 acres.

Cumulative program stats from 2006 to 2019 include: Total Area Covered (acres) 235,043; Conservation Cover (acres) 235,043; Water Conserved (acre feet) 470,087. Total Program Reported Expenditures \$164,492,666. See individual counties listed under "Conservation Reserve Enhancement" for detailed breakdown of performance measure information.

Tracker tells stories at a broad-brush level. Individual project performance measures and expenditures should not be relied upon for complete and total accuracy and should be confirmed with a project's lead implementer. Project locations subject to confidentiality provisions under state and federal law specify the location of a local conservation district or USDA service center office.
